ThinFlap™

BIOMET[®]
MICROFIXATION
Anticipate. Innovate.™

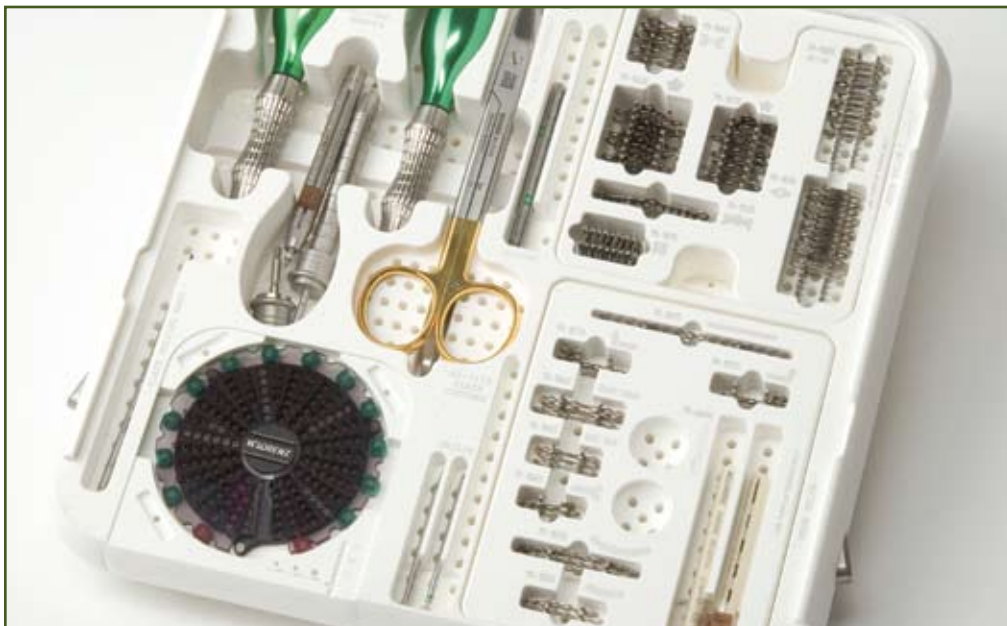

ThinFlap™: Keeping A Low Profile.

Anticipation and innovation. These two qualities have made Biomet Microfixation an industry leader. Founded by Walter Lorenz more than thirty years ago, Biomet Microfixation offers instrumentation, plating systems and related products for a wide range of surgical procedures.

Biomet Microfixation is proud to offer the Lorenz ThinFlap Plating System. Featuring an industry-leading .3mm plate profile, ThinFlap plates can enhance patient satisfaction significantly due to reduced plate palpitation.

ThinFlap is delivered in your choice of a conventional storage tray or the SterileTrac delivery system. The ThinFlap conventional storage tray offers drop-in tray storage, removable screw dial and a RapidFire® storage area. The SterileTrac delivery system offers a wide range of advantages, including improved lot traceability, accurate cost capturing and a variety of plate selections perfect for any cranial-flap closure.

To complement the SterileTrac delivery system, a convenient, space saving storage solution is available. The SterileTrac instrumentation tray holds screwdriver handles, forceps, plate cutters, drills and blades. The tray can be wrapped separately or stored with the hospital's craniotomy tray. For complete information on ThinFlap, contact us today.

Indications

- Reconstructive procedures
- Revision procedures

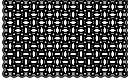

ThinFlap™ Advantages

- Industry leading .3mm profile
- Minimal or no plate palpitation
- Offered in conventional storage tray or in SterileTrac delivery system

ThinFlap SterileTrac™ Advantages

- Efficient inventory control
- Improved patient billing
- Improved lot traceability
